TIMELINE

2018-Now

Raymond James

- | Lead Technology Analyst |
- Create detailed technical documents utilized by developers in a waterfall environment.
- Develop solutions for complicated problems where in depth finance knowledge is needed in addition to detailed technological knowledge.
- Assist in the creation of ORACLE Financial projects, tables, automated jobs.
- Provide analysis of current systems and process and provide recommendations for improvements.

2016-2018

United Healthcare

- | Sr. Reporting Analyst |
- Showcased informative and visually appealing Tableau reports by working with stakeholders to determine what information was needed and quickly working to present it in an optimal way using AGILE methodology.
- Designed complex SQL queries from the ground up to access and combine data from several sources including DB2, SQL Server and Big Data sources.
- Presented myself as an available, confident, friendly, knowledgeable, and reliable source in order to maintain strong relationships with stakeholders and partners.
- Managed Production and Development databases by creating views, tables, stored procedures, and automating SSIS packages.

2014-2016

Citi

- | Business Analyst |
- Provided support, data, and reports to Human Resources Compensation teams around the globe.
- Developed unique and customized solutions to automate complex reports and manage large data stores in Microsoft Access and Excel.
- Automated previously manual work and focused on streamlining efficiency and improving accuracy.
- Held Excel and Access trainings to share my expertise with team members.

2013-2014

PricewaterhouseCoopers

- | Reporting Analyst |
- Modeled and Analyzed data for licensing and learning and development.
- Used predictive modeling and detail oriented process improvement to determine risk areas and preventive measures.
- Optimized Excel reports and incorporated automation to provide reports days earlier than previously available.

2012-2013

JP Morgan Chase

- | Systems Analyst |
- Primary contact for all data.
- Designed and Implemented automation tools for process improvements and security enhancements.
- Created detailed reports for external partners as well as executive level decisions.

ABOUT ME

Hello!

I'm Seth Engelson, I am a Business Intelligence Specialist. For the last several years, my focus has been on developing insightful reporting with Tableau, Microstrategy, Business Objects, and SSRS. Throughout my career, I've invested a lot of my time learning the back ends, installations, licensing, and adaption of these tools from a business perspective.

I strive for superior organization and problem solving skills, setting and achieving difficult professional goals for myself regularly, being a self starter, consistently completing all projects timely and efficiently, going above and beyond expectations, thinking outside of the box and paying great attention to detail.

I am a technophile, I'm always staying on the cutting edge, reading and researching changes and trends throughout the industry. Especially in terms of business intelligence.

Outside of work, I'm inseparable from my family and friends. My wife and I love the outdoors and we're always trying to find a new place to experience, take the dogs, and photograph.
